Muhammad Ali: Champion of the World – Jonah Winter AD860L

Saving Sweetness – Diane Stanley AD820L

Code	Explanation
BR	A book with a Lexile measure of OL or below is coded BR for Beginning Reader. These books are appropriate for emergent readers. Often BR books are not used for independent reading, but are read aloud by an adult to or with the child.
NC	These NC Non-Conforming books have a Lexile measure markedly higher than is typical for the intended audience or designated developmental level of the book. The NC code is useful when matching high-ability readers with a book that is still at an appropriate developmental level.
AD	Picture books often get an AD or Adult Directed code. They are usually read to a child, rather than a child reading them independently. Although seemingly easy reading, some picture books actually have pretty high Lexile measures, and could present a challenging independent reading experience to an age-appropriate reader. Initially, an adult may want to read the book along with a child.
IG	Books that consist of short, stand-alone pieces of text like in an encyclopedia or glossary are given an IG code for Illustrated Guide. Usually nonfiction, IG books are often used as a reference resource rather than read in their entirety like a storybook. The IG code does not have anything to do with reading levels, but instead conveys an idea of the kind of book and what the book typically will be used for in the classroom or library
HL	Librarians, teachers, and booksellers sometimes refer to young adult books written at low levels as high-low books. HL books are useful when matching older (grade 7 and beyond) struggling or reluctant readers with books about age-appropriate topics and issues written at elementary-school reading levels.
GN	Graphic novels and comic books get a GN code. Text appears primarily in voice or thought bubbles integrated into comic book-style illustrations. The impact of the pictures on reading comprehension is not captured in the Lexile measure of a graphic novel.
NP	Non-Prose
